To open an RFx in the Edge browser, follow these steps:

- 1. Open the Chrome browser and enter "edge://flags" in the URL bar.
- 2. In the search field, type "Origin Agent".
- 3. From the dropdown menu, choose "**Disabled**".
- 4. Finally, **Restart** the browser.

Navigation as below:

		Type edge://flags

\leftarrow C (\mathfrak{d} Edge edge://flag				
		Q Origin Agent	0	Reset all
	_/	Experiments	113.0.1774.42	
Search Origin Agen	t	Available	Unavaila	able
		Origin-keyed Agent Clusters by default Select the default behaviour for the Origin-Agent-Cluster http header. If enabled, an absent header will cause pages to be assigned to an origin-keyed agent cluster, and to a site-keyed agent cluster when disabled. Documents whose agent clusters are origin-keyed cannot set document.domain to relax the same-origin policy. – Mac, Windows, Linux, Android #origin-agent-cluster-default
